Summary

Final-year Computer Science student with experience in Java, Spring Boot, React.js, MySQL, and REST APIs. Built full-stack applications with JWT authentication and responsive user interfaces. Solved 250+ LeetCode problems and actively seeking Software Developer opportunities.

Education

- **Bachelor of Computer Science** 2023 – 2026
Mumbai University, Mumbai, India

Projects

- **HireTrack** — Java, Spring Boot, React.js, MySQL, JWT, REST APIs
GitHub *Live Demo: Coming Soon*
 - Built a full-stack job application tracking platform for managing job applications and interview stages.
 - Implemented JWT authentication and protected routes for secure user access.
 - Developed REST APIs for CRUD operations, application management, and status updates.
 - Designed a responsive React frontend using reusable components and Tailwind CSS.
 - Integrated MySQL database with proper entity relationships, validation, and exception handling.

Blog Application — Java, Spring Boot, MySQL, Spring Security, REST APIs

GitHub

- Developed RESTful APIs for posts, comments, and likes.
- Implemented JWT authentication and role-based access control.
- Designed layered architecture and MySQL relational schema.
- Added validation, exception handling, and standardized API responses.

DSA Practice (LeetCode) — Java

- Solved 250+ LeetCode problems covering arrays, linked lists, trees, recursion, backtracking.
- Strengthened problem-solving skills and understanding of time and space complexity.

Technical Skills

- **Languages:** Java, JavaScript, SQL
- **Backend:** Spring Boot, Spring Security, JWT, REST APIs
- **Frontend:** React.js, Tailwind CSS
- **Database:** MySQL
- **Tools:** Git, GitHub, Postman
- **Core Concepts:** DSA, OOP, DBMS
